Unique Words in the KJV Bible

* the number in brackets beside each word is the number of
times that word appeared in that book

Introduction

While I was working on a separate and unrelated project I ended up with a list of all the unique words for each book in the King James Version of the Bible. Since I thought that information was interesting I decided to save it for future reference.

You might wonder what possible use this information could have. After all, the KJV is simply a translation of the Bible and therefore doesn't reflect the true vocabulary of the original ancient languages. What possible use could there be in knowing that the book of I John has 360 different words, or that the word "love" occurs four times in the book of Revelation? Are there any deep insights in knowing that the word "love" appears 312 times while "hate" appears 90 times? Is it significant that the name "Jesus" appears exactly 997 times?

I admit it seems unlikely that there is any deep significance in how many times a word appeared in the original manuscripts. There's probably even less significance in counting words in translations. That being said, it's remarkable that a book as lovely and deep as I John uses such a simple and easy vocabulary.

There may be someone out there who's clever enough to find a use for this information. If so, here you go.
